

EDINOSA USA

CAPABILITIES STATEMENT

Engineer-led general contractor · Industrial & commercial construction

COMPANY OVERVIEW

Edinosa USA designs, fabricates and builds industrial and commercial facilities for private owners nationwide. We are licensed in California, Arizona, New Mexico and Texas. Our leadership is made up of degreed civil, mechanical and electrical engineers with more than 20 years in the field, and one team carries every project from first drawing to final inspection.

CORE COMPETENCIES

Commercial Construction

Civil, mechanical and electrical scope: site work, foundations, concrete and steel, HVAC, process piping, fire protection, power distribution, lighting and backup power.

Engineering & Fabrication

Structural, mechanical and electrical design, process engineering, feasibility studies, and shop fabrication of structural steel, platforms, mezzanines, piping spools and process components.

Racking Systems

Design, manufacture and installation of structural steel racking: selective, high-density and cantilever systems, inspections, repairs and upgrades.

DIFFERENTIATORS

- Engineers lead every project, from design to closeout
- Design, fabrication and construction under one roof
- AIA Allied Member; work under AIA standard contracts
- Licensed in CA, AZ, NM and TX; mobilizes nationwide
- Bilingual team working in English and Spanish
- Projects managed in Procore for real-time owner visibility
- Experience inside operating plants without stopping production
